

Arpit Satpute

Blockchain Developer

Nagpur, India | +91 91126-81009 | arpitrameshsatpute6986@gmail.com | [LinkedIn](#) | [Github](#)

Blockchain Engineer specializing in **Ethereum**, developing secure **Solidity** smart contracts for DeFi protocols, NFT marketplaces, and cross-chain systems, with expertise in smart contract security, gas optimization, Foundry testing, and full-stack Web3 development.

TECHNICAL SKILLS

Blockchain: Ethereum • Solidity • Foundry • Scaffold-ETH • OpenZeppelin • Hardhat • Wagmi/Viem • IPFS • Hyper-ledger

Standards: ERC-20/721/1155/4626/2981 • EIP-712/5192, ERC-1967 • ERC-4337

Security: Fuzz testing • Invariant testing • Gas optimisation • Cyfrin audit methodology

Frontend: React • React Native • Next.js • Tailwind CSS • Bootstrap

Backend & Infra: Java • Spring Boot • Spring Security • Node.js • JavaScript • REST APIs • Redis • Docker • RabbitMQ • CI/CD

Database: PostgreSQL • MongoDB • MySQL

PROJECTS

AURA-FARM | <https://aura-farm.tech>

Github | Feb 2026

Personalized yield aggregation with **soulbound risk profiles** tailored to individual risk tolerance..

- Architected a **Soulbound Risk NFT** system where users complete an AI risk assessment to mint a non-transferable NFT encoding **allocation across 3 ERC-4626 vault tiers**: Conservative, Balanced, Aggressive for automated capital allocation.
- Built on **Arc Testnet** with **Circle Gateway**, enabling **cross-chain USDC deposits** from Ethereum and Base, minting native USDC on Arc and **auto-routing funds to vaults** via Risk NFT profiles.
- Implemented **Nitrolite Protocol** cross-chain rebalancing, **reducing gas costs by 90%**, with a dashboard displaying live APY and P&L across vault tiers.

INSIGHT-YIELD | <https://insight-yield.vercel.app>

Github | July 2025

Intelligent yield optimization with **AI-driven risk scoring** tailored to individual capital strategies and DeFi protocol preferences.

- Designed a modular **ERC-4626 Vault system** on **Ethereum** enabling automated yield strategies and composable integration with **DeFi protocols**..
- Built a **custom Python AI engine** for real-time **risk scoring, APY forecasting, and optimal capital distribution**.
- Implemented **EIP-712 verification** flow ensuring all AI recommendations are authenticated and tamper-proof on-chain.

EXPERIENCE

Blockchain Engineer Intern | Cyberthon Technology

Jan 2026 - Apr 2026

Worked on blockchain solutions for real-world client requirements, collaborating with senior developers on production-grade smart contract and Web3 application development.

Freelance Developer | Self-Employed

Oct 2024 - Dec 2025

Delivered five client projects end-to-end, spanning React/Next.js frontends, Java Spring Boot backends, and helped some Early-Stage Start-Up projects.

ACHIEVEMENTS

- Won **3 national-level hackathons** and finished as finalist in 2 additional competitions
- Ranked as **Elite + Silver** in NPTEL (IIT Kharagpur) for **Blockchain** & its Applications Certification.
- Participated in **ETHGlobal Delhi** and **ETHGlobal HackMoney**, collaborating on Web3/blockchain projects with global developers
- Earned **Cyfrin smart contract security certifications** covering Foundry, fuzz testing, invariant testing, and protocol auditing concepts

EDUCATION

B.Tech in Computer Science

2022–2026

J D College of Engineering and Management, Nagpur

CGPA : 9.4
